1 MIGRATE Error with SQL serveur Base

1.1 The error description

The migrate command doesn't work when the base is SQL Server since the 3.1 django version.

The command migrate is working when the 3.0.14 django version is used.

In the following chapters, you will find 3 logs of the migrate command with 3 different versions:

- The correct logs with the 3.0.14 Django version
- The error logs with the 4.0.3 Django version
- The error logs with the 3.1 Django version
(not the same error as the 4.0.3 version)

```
DATABASES = {
    'default': {
        'ENGINE': 'sql_server.pyodbc',
        'NAME': 'baseName',
        'USER': 'sa',
        'PASSWORD': '*****',
        'HOST': 'DESKTOP-L4EIUHT\\SQLEXPRESS',
        'OPTIONS': {
            'use_legacy_date_fields': True,
            'provider': u'ODBC Driver 17 for SQL Server',
        }
    },
    # 'default': {
    #     'ENGINE': 'django.db.backends.sqlite3',
    #     'NAME': BASE_DIR / 'db.sqlite3',
    #     'DJANGO_SETTINGS_MODULE': 'xxx.settings',
    # }
}
```

1.2 The correct logs with the 3.0.14 Django version

PS C:\Users\acteon\PycharmProjects\test_django> **python manage.py migrate**

Operations to perform:

Apply all migrations: admin, auth, contenttypes, sessions

Running migrations:

```
Applying contenttypes.0001_initial...OK
Applying auth.0001_initial... OK
Applying admin.0001_initial... OK
Applying admin.0002_logentry_remove_auto_add... OK
Applying admin.0003_logentry_add_action_flag_choices... OK
Applying contenttypes.0002_remove_content_type_name... OK
Applying auth.0002_alter_permission_name_max_length... OK
Applying auth.0003_alter_user_email_max_length... OK
Applying auth.0004_alter_user_username_opts... OK
Applying auth.0005_alter_user_last_login_null... OK
Applying auth.0006_require_contenttypes_0002... OK
Applying auth.0007_alter_validators_add_error_messages... OK
Applying auth.0008_alter_user_username_max_length... OK
Applying auth.0009_alter_user_last_name_max_length... OK
Applying auth.0010_alter_group_name_max_length... OK
Applying auth.0011_update_proxy_permissions... OK
Applying sessions.0001_initial... OK
```

requirements.txt :

```
asgiref
Django==3.0.14
django-mssql-backend
mssql-django
pyodbc
pytz
sqlparse
tzdata
```

\$ pip install -r .\requirements.txt

\$ pip freeze
